Experience

August 2020 – Present

Software Developer, Avatar Systems, Frisco, TX

- Designed and implemented a robust web based document management system in its entirety.
 - Composed wireframes for every screen with UX in mind
 - Wrote well-documented code for the UI using Javascript and JQuery
 - Structured and organized the web app's relational database with SQL
 - Connected the frontend with the backend with an ASP.Net API, written primarily in C#
 - Developed a desktop service for users to upload files directly from TWAIN scanner to web browser
- Collaborated on web based accounting system for the oil industry
 - Added file conversion routines to the company's toolchain with ASP.NET and NuGet libraries
 - Fixed and updated system bugs via Mantis Bug Tracker
 - Assisted in creating a user management system complete with user permissions and roles
 - Populated SQL database with stored procedures to facilitate accounting system's business logic
 - Researched and prototyped OCR models for paper invoices using Python and Tesseract 4
- Planned and implemented a web based workflow system
 - Created tools for users to create rule-based workflows for company documents
 - Included a notification system that alerted users to their pending documents
 - Featured drag and drop functionality on a diagram for users to create their document workflows
 - Built using Javascript, C# and SQL

July 2019 – Present

Web Developer, RamirezGarza.dev

- Built portfolio site using React.js
 - Implemented a collapsible navigation panel from scratch and featured parallax scrolling on images
 - Recreated in 2022 with animations using Javascript and LESS
